

Kevin Incorvia

CTO & Co-Founder

Kevin Incorvia is a unique engineer with architect experience, a business background, and electronics expertise that enables him to work between hardware, software, and systems. Mr. Incorvia now is the CTO and Co-Founder of Suvie, a WiFi-enabled multi-zone countertop combination cooker and refrigerator kitchen robot that turns four individual food components (proteins, vegetables, starches, and sauces) into beautifully cooked, restaurant quality gourmet meals on-demand and controlled with a phone.

Prior to Suvie, Mr. Incorvia was a Software Engineer at Apple, where he worked on the Developer Publications team, developing the front facing API and data storage for the documentation platform that sends documentation to all developers across the globe. Previously, he was the lead software architect behind Reviewed.com and a member of Reviewed.com's executive team. He also was an independent Ruby on Rails contractor and has deep expertise in many coding languages and web analytics.

Mr. Incorvia earned a B.A. in Business Administration from Maharishi University in Fairfield, Iowa, a non-traditional school that values the complete development of individuals through a consciousness-first approach to education.
